CVIR Pre Procedure [1525]

General

Nursing

| Consent | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|] Complete consent for | Routine, Once Procedure: Diagnosis/Condition: Physician: Risks, benefits, and alternatives (as outlined by the Texas |
| | Medical Disclosure Panel, as appears on Houston Methodist Medical/Surgical Consent forms) were discussed with patient/surrogate? Pre-Procedure |
| /ital Signs | |
|] Vital signs - T/P/R/BP | Routine, Once For 1 Occurrences Upon arrival to Interventional Radiology unit., Pre-Procedure |
|] Pulse oximetry | Routine, Once For 1 Occurrences Current FIO2 or Room Air: Upon arrival to Interventional Radiology unit., Pre-Procedure |
| Nursing | |
|] Hold AM meds | Routine, Once For 1 Occurrences, Pre-Procedure |
|] Insert peripheral IV | Routine, Once Use 20-22 gauge Jelco catheter, Pre-Procedure |
|] Insert and maintain Foley | |
| [] Insert Foley catheter | Routine, Once Type: Size: Urinometer needed: Pre-Procedure |
| [] Foley Catheter Care | Routine, Until discontinued, Starting S Orders: Maintain Pre-Procedure |
|] Bedside glucose | Routine, Once If diabetic, upon arrival to Interventional Radiology/AOD unit. Notify Radiologist if glucose level less than 60 or greater than 200., Pre-Procedure |
| Diet | |
|] NPO after midnight | Diet effective midnight, Starting S+1 at 12:01 AM NPO: Except meds Pre-Operative fasting options: Pre-Procedure |
| Medications | |
| Antibiotics (Single Response) (Selection F | Required) |
| For Tunneled HD Catheter; Gastrostomy Placement; Gastrojejunostomy Tube Placement (Single Response) () Antibiotics: For Patients GREATER that | Tube cement; Port |

| 3 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. |

| |
| k for penicillin anaphylaxis that are culture isolate sensitive to Clindamycin |
| |
| 900 mg, intravenous, for 30 Minutes, once, For 1 Doses, |
| 900 mg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis o 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis "And" Linked Panel |
| Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis of 120 kg 2 g, intravenous, once, For 1 Doses, Pre-Procedure On call to the operating room. Administer one hour prior to the opening incision. Reason for Therapy: Surgical Prophylaxis "And" Linked Panel k for penicillin anaphylaxis that are culture isolate sensitive to Clindamycin 900 mg, intravenous, for 30 Minutes, once, For 1 Doses, |
| |

| [] gentamicin (GARAMYCIN) IVPB | 1.5 mg/kg, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
| | On call to the operating room. Administer one hour prior to the |
| | opening incision. |
| | Reason for Therapy: Surgical Prophylaxis |
| () For Biliary Drainage Catheter; Nephrostomy Tube Insertion; TIPS (Single Response) | |
| () cefTRIAxone (ROCEPHIN) IV | 1 g, intravenous, for 30 Minutes, once, For 1 Doses, Pre-Procedure |
| | On call to the operating room. Administer one hour prior to the opening |
| | incision. Reason for Therapy: Surgical Prophylaxis |
| | Surgical Prophylaxis: |
| () Aztreonam + Vancomycin - For PCN allergic | "And" Linked Panel |
| [] aztreonam (AZACTAM) IV | 2 g, intravenous, once, For 1 Doses, Pre-Procedure |
| | On call to the operating room. Administer one hour prior to the opening incision. |
| | Reason for Therapy: Surgical Prophylaxis |
| [] vancomycin (VANCOCIN) IV | 15 mg/kg, intravenous, once, For 1 Doses, Pre-Procedure |
| | On call to the operating room. Administer one hour prior to the opening |
| | incision. Reason for Therapy: Surgical Prophylaxis |
| 1 | Reason for merapy. Surgical Frophylaxis |
| lidocaine (XYLOCAINE) 1% injection | |
| [] lidocaine (XYLOCAINE) 10 mg/mL (1 %) injection | injection, once, For 1 Doses, Pre-Procedure |
| | ··· ····· ···························· |
| Buffered Lidocaine 1% Injection | |
| [] lidocaine 1% buffered with 8.4% sodium bicarbon | ate 10 mL, injection, once, For 1 Doses, Pre-Procedure |
| injection | |
| determined by the attending or referring physician. In a true medical emergency situation the exam sh direction of the attending physician. (attachment t | ould proceed with an accelerated premedication schedule at the o Radiology Policy R 711) |
| | |
| () Oral methyIPREDNISolone (MEDROL) tablet | 32 mg, oral, once, For 1 Doses, Pre-Procedure |
| | For iodine allergy prophylaxis. Give 6-12 hours prior to the examination. |
| () IV methylPREDNISolone succinate (Solu-MEDRO | |
| mg/mL injection | Pre-Procedure |
| | For iodine allergy prophylaxis. Give 2 hours prior to the examination. |
| For patients with allergic reaction | |
| [] diphenhydrAMINE (BENADRYL) injection | 50 mg, intravenous, once, For 1 Doses, Pre-Procedure |
| | Given in Interventional Radiology unit |
| [] methyIPREDNISolone sodium succinate | 125 mg, intravenous, once, For 1 Doses, Pre-Procedure |
| (Solu-MEDROL) injection | Given in Interventional Radiology unit |
| VTE | |
| Labs | |
| COVID-19 Qualitative PCR | |
| [] COVID-19 qualitative RT-PCR - Nasal Swab | STAT For 1 Occurrences |
| ••••••••••••••••••••••••••••••••••••••• | Specimen Source: Nasal Swab Is this for pre-procedure or non-PUI assessment? Yes Pre-Procedure |
| | |

| [] CBC and differential | Once, Starting S, Pre-Procedure | |
|----------------------------------|---------------------------------|--|
| [] Comprehensive metabolic panel | Once, Pre-Procedure | |
| [] Basic metabolic panel | Once, Starting S, Pre-Procedure | |
| [] Protime-INR | Once, Starting S, Pre-Procedure | |
| [] Platelet count | Once, Pre-Procedure | |
| [] Partial thromboplastin time | Once, Starting S, Pre-Procedure | |
| [] hCG qualitative, serum | Once, Pre-Procedure | |
