Audience: Providers

Electronically Prescribe Controlled Substances

To e-prescribe controlled substances in Epic, you must first install the **SecureAuth Authenticate** app on your smartphone. This app is required as a secondary form of authentication when e-prescribing controlled substances to confirm you're the authorizing provider.

To Get Started:

- Download the **SecureAuth Authenticate** app from the [Apps Store](#) for iOS or [GooglePlay](#) for Android.

Setup

1. From your computer, logon to: https://auth.houstonmethodist.org/secureauth85/.
2. Enter your Username (Houston Methodist network ID) and password.
   a. The **Setup Multi-Factor Authentication** window will open.
3. Keep this page open then return to your mobile device to continue the process.

4. From your mobile device, open the SecureAuth app then Click **Connect Account** and select **Connect with QR Code.**

5. Enter the **Verification Code** displayed on your mobile device.
6. Click **Enable.**
    a. *The **Setup Complete** window will open.*
