Sotalol IV (BETAPACE) Initiation Protocol (RESTRICTED) [5313]

IV sotalol is restricted to Electrophysiology and Cardiology only and the planned discharge must be within 24 hours.

Medications

Medications to consider prior to initiation of IV Sotalol **Do not initiate if baseline QTc>500 msec and/or K level <4 mEq/L**

[] magnesium level less than 2 mEq/L	2 g, intravenous, once, For 1 Doses	
[] potassium level 3.5 mEq/L to 4 mEq/L	20 mEq, oral, once, For 1 Doses	
[] potassium level less than 3.5 mEq/L	40 mEq, oral, once, For 1 Doses	
	Recheck potassium after 1 hour	

Choose dose based on creatinine clearance and target oral dose (Single Response)

) CrCl > 90 mL/min (Single Response) () Target oral dose 40 mg two times daily	"And" Linked Panel
	nacy Consult. Do not remove the attached consult order.
[] sotaloL in sodium chloride 0.9% 100 mL IVPB (RESTRICTED)	 60 mg, intravenous, Administer over: 60 Minutes, once, For 1 Doses Administer over 1 hour infusion. Contact provider if QTc > 500 msec. RESTRICTED to Cardiology and Electrophysiology specialists. Are you a Cardiology or Electrophysiology specialist or ordering on behalf of one? This medication is restricted to patients who have a planned discharge within 24hr and are not classified as inpatient status. Do you attest that this restriction has been met? This medication is restricted to cath lab area or ED at entities prepared to operationalize patient flow and med safety as determined by the entity cath lab director, ED leadership, and pharmacy director. Do you attest that this restriction has been met?
[] sotaloL (BETAPACE) tablet (RESTRICTED)	40 mg, oral, every 12 hours, Starting H+5 Hours, For 2 Doses Give 1st dose 4 hours after end of sotalol infusion. Initiation of therapy is RESTRICTED to Cardiology specialists. Continuation of home therapy is not restricted to Cardiology specialist. Please attest that these restrictions are met: BP & HR HOLD parameters for this order: Contact Physician if:

Nursing

Nursing Interventions

[X] IV Sotalol Protocol:	Routine, Until discontinued, Starting S
	Obtain EKG every 15 minutes during 1-hour infusion
	STOP infusion if QTC > 500 msec and K < 4 mEq/L and
	contact physician
[X] Sotalol oral dose after IV Sotalol Infusion:	Routine, Until discontinued, Starting S
	Obtain EKG 2 hours after each oral dose (total of 2 doses)

Vital Signs

[X] Telemetry	"And" Linked Panel
[X] Telemetry monitoring	Routine, Continuous For 3 Days Order: Place in Centralized Telemetry Monitor: EKG Monitoring Only (Telemetry Box) Reason for telemetry: Can be off of Telemetry for tests and baths? Yes
[X] Telemetry Additional Setup Information	Routine, Continuous High Heart Rate (BPM): 120 Low Heart Rate(BPM): 50 High PVC's (per minute): 10 High SBP(mmHg): 175 Low SBP(mmHg): 100 High DBP(mmHg): 95 Low DBP(mmHg): 40 Low Mean BP: 60 High Mean BP: 120 Low SPO2(%): 94

Labs

Baseline la	abs
-------------	-----

[X] Basic metabolic panel	STAT For 1 Occurrences
[X] Basic metabolic panel	AM draw repeats, Starting S+1 For 2 Occurrences
[X] Magnesium	STAT For 1 Occurrences
	Obtain baseline if not obtained within 24 hours prior
[X] Magnesium	AM draw repeats, Starting S+1 For 2 Occurrences

Cardiology

-	VO	
E	κG	

[X] ECG 12 lead	Routine, Once, Starting S For 1 Occurrences
	Clinical Indications: Cardiac Arrhythmia
	Interpreting Physician:
	Obtain baseline ECG
[X] ECG 12 lead	Routine, Conditional Frequency, Starting S For 2 Occurrences
	Clinical Indications: Cardiac Arrhythmia
	Interpreting Physician:
	Obtain ECG 2 hours after each oral dose (total of 2 doses)
